The light penetrate the water, even in muddy condition. With a battery upgrade and little care for this beast will last a very long time. Definitely would buy again. Will mod this headlamp to mount on my kingfisher bow to easier access in the future.Jake J.For the price you can't beat it. It's VERY bright! It holds its charge for a reasonable amount of time considering the brightness it illuminates. It takes mines about 8hours to recharge once batteries go dead. The only reason I didn't give it 5 stars is because the two side lense lights becomes lose easily and can be lost if you don't see it when they come a loose. Tho the side lights will still work even if the side lense come off. The head straps to tighten to your head aren't the greatest. But for the cost and the brightness of this light I'd make this purchase again.Graham A.Great headlight, very bright! The head strap could be a little more secure fitting.Cassie V.This is the second headlight purchased because after I bought one for my son for his birthday my husband had to have one as he uses these all the time and it is great to find one that can be recharged instead of having to continuously buy batteries. I have always used the first one which is the big light in the middle. It only lasts full brightness for about 80 minutes. So you need ex. Batteries charged for stand by. This is my second purchase of this same product, my coworker had to have one after seeing mine!George C.Comfortable to wear puts off a lot of light and the red option is nice for not wanting to be seen at night batteries last a long timeCorey A.batteries do not last long enough, other than that work fine, lots of light for sure. SUPER bright, and an insanely good value for such a very low price. I'll be buying these as gifts for Christmas. Harper V.I use this for garage work bought separate one for out door, i have so much of this and it never enough for mePeter A.I was looking for a good headlamp for the boy scout campout. This product comes with 2 rechargeable batteries which is great. You can click multiple times to turn lights in different modes. It fits securely on your head. It has an adjustable strap to fit your head size.Gray T.I have only great things to say about this headlamp except 1 thing. The plastic forehead piece is extremely flimsy where the straps pass through on the sides. The pressure point when the unit is worn is on the thinnest part of the plastic. The left side of my forehead piece broke where the strap passes through the first night I used it. I am looking for a replacement part but have had zero success in finding somewhere that sells parts for these. I guess it is a good thing that I bought a package deal of three of these on Amazon. Hopefully the remains two will hold up better. On a brighter note, I fished almost all night and the light lasted the entire time. It was dull near the end but it proved itself to be a really good light until the plastic broke. I'm giving it a 4 star.
